

CAD2VR®

CAD-Models easily viewed in Virtual Reality

Easily imported.

With our CAD2VR® software you can easily load and view CAD models in Virtual Reality. Utilize 3D models straight out of construction, and view them at any time in their original size.

- ⦿ Check ergonomics, design and completeness.
- ⦿ Increase product quality and save costs through error detection before production.
- ⦿ Evaluate space requirements and serviceability.
- ⦿ Discuss project status directly on the product - in a team or with the customer.
- ⦿ Present the product at any time - before production and without a prototype.

Windows

HTC VIVE /
VIVE Pro

Oculus Rift S

Interaction

Interact with all components of the model.

Hierarchy

Easily and intuitively navigate throughout all subcomponents in the model hierarchy.

VR & Desktop mode

View CAD files fast and easily in VR or on screen.

3D - Photos

- Product images
- Environment images
- Sectional images

3D - Movies

- Imagefilms
- Product clips
- Explanatory films

3D - Interactive

- Product applications
- Configurators
- Realtime
- Virtual Reality
- Augmented Reality
- 360° Rotations
